

Blue Jenny Wire Spinner

\$750.00+gst

- Reduce frustrating tangles
- Wire pickup system
- Separate drive ring
- Tension activated brake
- Virtually drag free
- Reduces overspin
- Ground or ute/trailer mounted
- Single or part of a stacked module

The **Blue Jenny Wire Spinner** is a robust wire spinner built to reduce frustrating tangles. A wire pickup system combined with a separate drive ring and tension activated brake ensures a virtually drag free wire jenny that won't overspin.

The BlueJenny is equally able to sit on the ground or in the back of the ute/trailer, as a single or part of a stacked module.

If it only saves one tangle a day, then it's a good day.
